

I believe the petition for rulemaking (RM-10641) would cause an unnecessary burden, and it's associated cost(s) would cause some National retailers to drop amateur equipment from their product lines..Also, it proposes further Government intrusion into the privacy of it's citizens. The problem it is intended to solve is

not of "Epidemic" proportions, and is already cared for by other agencies. Retailers are not "our brother's keepers"-J.W. White
